INDEX TO VOLUME XII.

ACID, hydrocyanic, 385
——, sulphuric, 387
Ærolites, W. Folger on, 173
———, collection of, 183
Ærostation, 372
———, E. C. Genet on, 94, 310
———, E. Robertson, 166
———, Editor on, 325
Agriculture, J. E. Muse on, 165
Alger, F. Mineralogy of Nova Scotia, 176, 227
Amphibia, specimens of, 281
Analysis of soils, 370
Anhydrous sulphuric acid, 200
Animals, living, in solid bodies, 395
Anthracites of Pennsylvania, Pierce on, 54
———— of Europe and America, 75
Anthracite mines, Thomas Ritter on, 301
Antigua, minerals from, 378
Ashes, volcanic, 194
Astronomical prize, 194
Atmosphere, luminous appearance in, 380
Atomic theory, 7
Balloons, ascent of, 166
———, rarified air, 372
Barometer gage eudiometer, 40
Batteries, dry voltaic, 195
Beck, Lewis C. on phosphuretted hydrogen, 294
Belmont anthracite mines, 301
Bhagovad-Gitâh, 198
Binomial theorem, Strong on, 132
Bird, Isaac, notice of Palestine, 145
Bitumen, &c. in stones, 147
Blake, E. W. on crank motion, 338
Blowing machinery of furnaces, Quinby on, 128
Boring for fresh water, 136
Breislak, Scipio, death of, 192
Brewster, Dr. on fluids in mineral cavities, 214
Bridge, iron, 197
Brome, a new substance, 198
Browne, P. A. geological survey of Pennsylvania, 172

Brucite, 304
Burrall, Wm. on native iron, 154
Cadmia, I. Doolittle on, 168
Calorimotor, 11
Calamine in Missouri, 378
Canal survey, Hon. S. Van Rensselaer's, 17
Canals of Pennsylvania, 54
Carbonicometer, 48
Caricography, appendix to, 296
Carpenter on trituration of mercury, 173
Cavities in crystals, 214
Charcoal, 389
Chemical science, Prof. Olmsted on, 1
Children, labour of in manufactories, 194
Cincinnati Medical Journal, 382
Clay, porcelain, 298
Clemens, J. W. on the spoonbill sturgeon, 204
Coal, bituminous, near Harrisburgh, 378
——, authracite of Pennsylvania, 54
——, Vanuxem on the formation of, 86
Cobalt in Missouri, 378
Crank motion, A. B Quinby, 124, 344
————, E. W. Blake, 338
————, I. Doolittle, 367
Darlington, Wm. Flora Cestrica, 177
Davis, E. Meteorological Journal, 119
————, Fries' Systema Mycologicum, 235
Deaf and dumb, 197
Deflagrator, 11
Dewees, Dr. on denarcotised laudanum, 292
Dewey, Prof. C. appendix to caricography, 296
————, on porcelain clay, 298
Diluvial deposits in New-York and elsewhere, 17
Disbrow, Levi, boring for fresh water, 136
Doolittle, Isaac, on cadmia, 168
————, crank motion, 367
Dupin, C. on education in France, 392
Dupuytren, operations on the lower jaw, 386
Eaton, Prof. on magnetic needles, 14, 232
————— diluvial deposits, 17
————— analysis of soils, 370
Editor, remarks on ærostation, 325
Education in Egypt, 383
———— Switzerland, 191
———— France, 392
Electricity, conductors of, 199
———— transports ponderable matter, 383
Electro-magnetism, 199, 382
Embalming, Dr. Granville on, 183
Emerson, Rev. R. notices by, 170
Ergot, M Léveillé on, 398
Eudiometrical apparatus, Prof. Hare's, 36
Field, Martin, meteorological table, 364
Finch's geology, 383
Floating islands, 122
Flora Cestrica, 177
——, compendium of Torrey's, 179

Fluids in the cavities of minerals, 214
——, tenet on the upward forces of, 310
Fossil trees in Ohio, 205
France, education in, 392
Fries systema mycologicum, 235
Fungi, system of the, 235
Galvanism, 11
Gas measure, 39
Gay Lussite, 137
Gnet, E. C. upward forces of fluids, 94, 310
Geneva, reading society, 198
Geographical society of Paris, 373
Geography, Woodbridge's, 373
Geological survey of Pennsylvania, 173
Geology, Finch's new work on, 383
——— of Hampshire county, 238
Georama, 190
Gold, native, in Vermont, 177
—— of Russia, 384
Granville, Dr. on embalming, 183
Grape cultivated in Ohio, 209
Grass preserved in gravel, 170
Gypsum, the formation of, 92
Hall, Prof. notice of Palestine, 145
Hampshire county, geology of, 238
Hanman, J. F. on preserving specimens of animals, 171, 271
Hare, Prof. eudiometrical apparatus, 36
—— ——— materiality of heat, 50, 359, 366
—— ——— test for opium in solution, 290
——— denarcotised laudanum, 291
Heat, 9, 50, 359, 366
Heidelberg collection of rocks and petrifactions, 399
Henry, Dr. action of platinum on gases, 181
Herbarium, 171
Heuland, Mr. ærolites and meteoric iron, 183
Hildreth, Dr. S. P spoonbill sturgeon, 202
——————— fossil trees, 205
——————— climate, &c. of Ohio, 206
——————— meteorological observations, 213
Hop, lupulin of, 388
Horticultural establishment, 399
Humboldt on precious metals, 384
Hydrogen, phosphuretted, formation of, 294
Ice-house of St. Ouen, 184
Icosandria, 178
Instruction, mutual, 189
Irised shadows, F. Shepard on, 172
Iron, native, 154
——, meteoric, collection of, 183
Islands, floating, 122
Jefferson, Thomas, eulogy on, 399
Jeweller's powder, 188
Journal, medical, 382
——— of Science, American, 394
Knox, G. composition of stones, 147
Laudanum, denarcotised, 291
Lead mines of Hampshire county, 238
——————— Missouri, 379

Leaden pipes, 189
Lee, C. A. on native iron, 154
Library, portable, 391
Light, solar, curious effect of, 164, 180
Lightning destroys magnetism, 382
Linnæan Society of Paris, 397
Lovell, Dr meteorological register, 149
Lungs, function of, 396
Lupulin, 388
Lyon, Lucius, pyrites investing quartz, &c. 162
Machines, maximum effect of, 346
Magnetic needles, Prof. Eaton on, 14, 232
Magnetism destroyed by lightning, 382
Mammalia, preserving specimens of, 171, 271
Manufactories, labour of children in, 194
Marcet, F. on poisons, 196
Marine shells, 89
Mastodon, fossil remains of, 380
Mauch Chunk, 57
Mayer, Prof. on respiration, 390
Meade, W. anthracites of Europe and America, 75
———, preserving specimens of animals, 271
———, American and European minerals, 303
Meconic acid, 290, 293
Medical institution and journals, 382
Menardite, a new mineral, 386
Metals, precious, Humboldt on, 384
Meteorological register, 149
———— journal, Westfield, 119
———————, Marietta, 213
———————, Newfane, 364
Mineral, new, 386
Mineralogy and Geology, new works on, 173, 383
———— of Nova Scotia, 176, 227
———— Vesuvius, 185
———— Hampshire county, 238
Minerals, localities of, 154, 156, 161, 169, 176, 259, 376, 378
———, collections of, 399
———— of Europe and N. America, 303
Mines, Russian, 197
———, lead, of Hampshire county, 238
———————— Missouri, 376, 379
———, anthracite, of Belmont, 301
Missouri, minerals of, 376, 378, 379
Mitchill, Dr. on plants growing on living animals, 21
———————— the spoonbill sturgeon, 201
Nantucket, Philosophical Institute, 173
Napoleon's library, 390
Nash, A. Geology, &c. of Hampshire county, 238
———, fascination of snakes, 368
Needles, magnetic, 14, 232
Newellian Sphere, 103
Newton's Principia, review of, 28, 330
Nitrogen abstracted from the atmosphere, 85
Nova Scotia, mineralogy of, 176, 227
Ohio, climate and productions of, 206
Oil, inflammable, 388

Olmsted, Prof. on chemical science, 1
———— criticism on heat, 50, 359, 366
Opal, grand, 384
Opium, test for, 291
Oxygen, abstracted from the atmosphere, 91
Palestine, facts concerning, 145
Paragrêle, 398
Paris Linnæan Society, 397
Parasitical plants, 21
Patten, J. H. on the steam-boat Babcock, 115
Pennsylvania, Pierce on, 54
————, Geological survey of, 173
Percival, J. G. curious effect of solar light, 164, 180
Petrifactions, collections of, 399
Pettingall, Amos, on floating islands, 122
Phosphuretted hydrogen, L. C. Beck on, 294
Pierce, James, on coal regions, 54
Planets, motion of, represented, 103
Platinum, action of on combustible gases, 181
Poisons acting on vegetables, 196
Polyodon feuille, 201
Potatoe, growth of, 170
Pottsville, 63
Principia of Newton, 28, 320
Proportions, definite, 1
Quinby on Crank Motion, 124, 338, 344
———— blowing machinery of furnaces, 128
———— maximum effect of machines, 346
Refracting power of the atmosphere, 299
Refrigerating compound, 195
Respiration, chemical process of, 396
Review of the Principia of Newton, 28, 330
———, North American, 394
Ritter, Thomas, Belmont anthracite, 301
Robertson, E. the æronaut, 166
Salt springs of Pennsylvania, 70
Sea serpent, 375
Shepard, C. U. on native iron, 155
———— notice of minerals, 156, 161
———— measurement of topaz, 158
———— Cyanite and Sillimanite, 159
Sillimanite, 159
Snakes, preserving of, 288
———, fascination of, 368
Society, Linnæan, of Paris, 397
Soda, nitrate of, 385
Soils, analysis of, 370
Solar spots, 199
South Carolina Med. Inst. and Journal, 382
Springs, new mineral, 144
Steam-boat Babcock, 115
Steam-engine, 385
Stones, Knox's analysis of, 147
Strong, Prof. binomial theorem, 132
Sturgeon, spoonbill, 201
Sulphate of iron, 387
Sulphuric acid, anhydrous, 200
Summer, Indian, 126

Surgeons, U S. meteorological observations, 149
Surgery, 386
Switzerland, education in, 191
Taxidermia, 171, 271,
Technological institute, 197
Thermometer, graduation of, 397
Timber, seasoning of, 163
Titanium, 189
———, in feldspar and serpentine, 187
Torrey's Flora, compendium of, 179
Troost, minerals of Missouri, 376, 378, 379
Vallot, M. on living animals in solid bodies, 395
Van Rensselaer, Dr. notice of the mastodon, 380
———— ——, lectures on geology, 399
Vanuxem, Prof. on abstraction from the atmosphere, 84
Vesuvius, mineralogy of, 185
Volcanic ashes, 194
Voltaic batteries, dry, 195
Volumeter, Prof. Hare's, 36
Walls, preserved from dampness, 193
Water, boring for fresh, 136
Water-wheels, accelerated by night, 163
Webster, Noah, notices by, 163, 380
Wheat, manures for, 165
———, soil for, 372
Wollaston's scale, 4
Woodbridge's geography, 373
